

# Threely Bike

- \* Weight 7kg
- \* Choose your frame colour
- \* Tricycle
- \* Individually adjustable
- \* Smooth running
- \* Suitable for children from 60cm

This bike is specially developed for children with a growth limitation. The bike is mainly made out of aluminum. This in combination with the right drive, makes the Threely Bike very user friendly. The pedals, the saddle and the handlebars are adjustable so everybody can learn how to ride a bike! Option is a push rod to support where necessary. The frame is available in three different colours!
